Willis Unveils Powerful Analytical Tool to Determine Proper D&O Protection

Willis Integrated Solutions D&O Model (WISDOMSM) Brings Even More Science to the Art of Directors and Officers Liability Insurance

New York, NY, October 18, 2007 – Willis Group Holdings (NYSE: WSH), the global insurance broker, announces the launch of the Willis Integrated Solutions D&O Model (WISDOMSM), a proprietary analytical tool that provides robust decision support to clients in the design of D&O insurance programs.

“Through WISDOMSM, Willis now has the means to more scientifically determine the optimal D&O program structure for clients,” said **Ann Longmore**, Executive Vice President of Willis’ Executive Risks Practice. “By combining the power of risk analytics with the wisdom and experience of our experts, we can begin to master the decision-making process of insurance placement.”

WISDOMSM is a proprietary modeling tool that provides information and analysis that is more quantitative and client-specific than traditional benchmarking. Working with two leading research firms (Audit Integrity and Advisen), WISDOMSM draws from a large database of historical D&O losses, accounting and corporate governance metrics, high risk events, and stock price volatility in order to generate loss probability distributions that show both the magnitude and likelihood of future losses. The model then incorporates client-specific factors relating to risk capacity and risk appetite to determine the optimal D&O program structure.

Current and prospective clients interested in obtaining more information can contact Alexis Scott at (212) 915-8238, or email Alexis.Scott@Willis.com.
