

The Willis Building - Vital Statistics

- The Willis Building is the fourth tallest building in the City of London. It is 125 meters high or two and a half times the height of Nelson's Column.
- The Willis Building features 320,000 lettable square feet, with an additional 50,000 square feet of space in the basement levels and has a maximum capacity of 2,700 people.
- The adjacent Fenchurch Avenue Building comprises 120,000 lettable square feet and has a maximum capacity of 1,000 people.
- Lloyd's used to occupy the site of The Willis Building. The insurance market was at 51 Lime Street from 1958-1986, when it moved to 1 Lime Street.
- 30,000 people worked on the development from start to finish - 1,500,000 man hours were needed to complete the project.
- The building weighs 65,000 tonnes or the equivalent of 650 blue whales.
- The piled foundations are 38 meters deep or the length of four and a half London buses.
- Over 15,000 cubic meters of concrete were used in the construction of The Willis Building – enough to fill six Olympic swimming pools.
- There are 5,500 tonnes of steel, the equivalent of 55 blue whales.
- The overall area is 67,500 square meters, which is equal to 11 football pitches.
- There are 21 high-speed lifts which move at speeds of 15 miles per hour.
- There are 3,771 windows.
