

Don't Let Your Fleet Fleece You - RMG202

Wednesday, 2:30 pm - 4:00 pm

The practicable aspects of developing a fleet policy for both owned and non-owned exposures goes beyond merely drafting a written policy. In order for a fleet policy to be effective, internal constituents must agree with the need and scope of the program. We will focus on understanding the elements of an effective fleet policy and some of the practical hurdles that must be addressed in order to implement a policy. Examples of policies will be used to highlight pitfalls and best practices. You will leave with a grasp of the critical elements of an effective fleet program. This session is hosted by the RIMS Cumberland Chapter.
