

Set Your Captive Free: 21st Century Ideas to Make Your Captive Work Harder - INS300

Monday, 1:45 pm - 3:15 pm

Your captive could be making a bigger contribution to the bottom line if you've had it for more than a few years. Most captives were historically created for specific reasons and addressed a limited area of risk, such as workers compensation or general liability. While your captive as currently configured has probably done an admirable job, new ideas have developed and legislation passed to expand what captives can do. The original rationale for creating your captive may no longer even make sense. Explore strategic and creative alternatives through a captive utilization analysis. The panel, which includes a broker specializing in captives and two experienced risk managers, will focus on captive coverages, risk retention, asset allocation, domicile review, tax and accounting issues and more.
